

Position: Physiotherapist

Job Description

- Assess physical and functional status and needs of clients with physical limitations resulting from stroke, traumatic brain injury, amputation and various neuromuscular conditions.
- Design and provide evidence-based and client-centered interventions (individual and groups) in collaboration with the multi-disciplinary team to improve client ability in functional domains, so as to promote reintegration to home, work and society.
- Work collaboratively with a dynamic multi-disciplinary team to provide clinically effective service to achieve client health and vocational goals.
- Educate clients' families and employers about how to accommodate and support clients in their rehabilitation.
- Ensure comprehensive documentation where all relevant information related to client care is recorded and available to all members of the multi-disciplinary team.
- Perform field work involving visits to healthcare institutions, home and worksite visits to support clients' transition into employment and the community.
- Conduct public education and outreach for programmes and services.

Job requirements/details

- At least 3 year(s) of working experience in the related field is required for this position.
- Part-time (negotiable working schedule).
